

TC-1100 Full-Size Radar Sign

RADAR SIGNS

CALM TRAFFIC. SAVE LIVES. ENHANCE AWARENESS.

RADAR SIGNS: WHAT TO KNOW

Radar speed signs, also known as driver feedback signs, are one of the most effective ways to slow traffic and increase driver awareness. These LED signs display vehicle speeds in real time, prompting drivers to self-correct before a citation or crash occurs. Studies* show that radar signs can reduce average vehicle speeds by up to 10% or more, making them a smart, budget-friendly safety enhancement for communities of all sizes.

POPULAR MODELS

TC-400 Portable Radar Sign

Lightweight and easily mounted to existing poles. Perfect for temporary use or rotation between high-speed areas.

11" or 13" display

TC-600 Permanent Radar Sign

Larger display with data collection and solar options ideal for neighborhoods and school zones.

TC-1100 Full-Size Radar Sign

Maximum visibility and optional message display for major roadways and community gateways.

WHY CHOOSE RADAR SIGNS?

- **Immediate Results:** Drivers naturally slow down when their speed is displayed.
- **Proven Safety Impact:** Reduces speeding-related crashes and enhances pedestrian safety.*
- **Durable Construction:** Industrial-grade aluminum housing and weather-sealed electronics built to withstand all weather conditions.
- **Flexible Power Options:** Choose from AC, battery, or solar power configurations to fit your site.
- **Data Collection Capabilities:** Built-in traffic reporting helps cities analyze speed trends and plan enforcement.
- **Low Maintenance:** Simple to install and operate, no in-ground sensors or external wiring required.

RADAR SIGNS

CALM TRAFFIC. SAVE LIVES. ENHANCE AWARENESS.

APPLICATIONS

- **School Zones:** Reinforce safe driving during student arrival and dismissal.
- **Neighborhoods:** Reduce cut-through speeding and improve quality of life.
- **Work Zones:** Protect crews and motorists with real-time speed feedback.
- **City Gateways:** Alert drivers to local speed limits as they enter the community.

WHY WORK WITH A&A SAFETY?

- **Experienced Partner:** Decades of expertise in traffic control, pavement marking, and safety products.
- **Turnkey Service:** We provide complete setup; product selection, installation, and programming.
- **Trusted by Municipalities:** Proven results across cities and counties throughout the Midwest and beyond.
- **Local Support:** Offices in Cincinnati, Dayton, and Cleveland.
