A History of High Standards

Founded as a barricade and flasher rental company in 1982, A&A Safety expanded into pavement marking and other construction services in 1992. Simultaneously, rental and sales inventory grew to include an extensive variety of traffic devices, electronic signage and tools. Currently A&A Safety offers the latest in message boards, portable traffic signals, variable speed limit signs, and more.

In recent years, A&A Safety teams innovated by designing custom trucks to ensure the proper application of new pavement markings. As a result, the quality and durability of pavement-marking projects is improved.

Thermoplastic pavement marking on an interstate highway by A&A Safety.

Industry Experts

To help ensure high safety standards for all drivers, A&A Safety associates serve on the Ohio Contractor's Association (OCA) board and regional ATTSA (American Traffic Safety Services Association) committees. These organizations help the industry develop best practices and educate future workforces.

We sell, distribute or rent thousands of items from manufacturers such as Traffix Devices, Horizon Signal, Radarsign, 3M, Impact Recovery, LaneLight and Stanley Hydraulic Tools. If you don't see what you need, give us a call and we'll find what's right for your project.

Services:

- Pavement marking for streets, highways, bridges, runways, schools and parking lots (thermoplastic, epoxy, & traffic paint)
- Reflective pavement marker installation and removal. Includes snow-plowable RPMs, non-snow-plowable RPMs and replacement of lenses
- Pavement marking removal: grinding & water blasting, as well as grooving
- Specialty thermoplastic for formed and decorative sidewalks or street graphics
- High-friction surface installation
- Maintenance of traffic and consulting

A&A Safety crew installing high-friction surface.

Products:

- Portable message boards
- Trailer and truck-mounted arrow boards
- Portable traffic signals
- Truck-mounted and towable attenuators
- RRFB pedestrian crosswalk systems
- LED-enhanced signs and flashing beacons
- Radar driver feedback signs
- Cones & barrels
- Signs, traffic control devices and accessories
- Hydraulic tools
- Barrier walls: water, concrete & steel
- MUTCD compliant signs
- Sign mounts and brackets
- Custom signage manufacturing

Maintenance of traffic services and products in downtown Cincinnati.

Message Boards, Arrow Boards, Traffic Signals & Attenuators

Portable Message Boards:

Rely on portable, changeable, message signs (PCMS) to communicate simply and effectively. Available with three-line or full matrix displays, they are designed for all types of work zones and events. Choose from mini, mid or full-sized units.

Trailer & Truck Mounted Arrow Boards:

Arrow boards help ensure safety and smooth traffic management in areas where lane closures are required.

Portable Traffic Signals & AFAD Systems:

The SQ2 system is one of the most dependable and user-friendly flagger safety PTS systems, enabling work crews to complete projects more quickly and safely.

The SQ3TS system from Horizon Signal is a heavy-duty portable traffic signal (PTS). The SQ3TS has a 25-year design life and industry-leading 100 mph wind load, based on manufacturer testing.

These trailer-mounted and hitch-mounted automated flaggers (AFAD – Automated Flagger Assistance Devices) are designed keep workers safely away from traffic and can reduce accidents involving flaggers.

Truck Mounted & Towable Attenuators:

The Scorpion™ truck-mounted attenuator, from Traffix is hydraulically powered and works well in stationary and mobile construction zones. The Scorpion II TL-3 towable attenuator is one of the first MASH-tested towable attenuators. The Scorpion II towable attenuator attaches to a truck and requires little to no modification of the host vehicle. See traffixdevices.com for information on MASH testing.

Crosswalk Systems, LED-Enhanced Signs, Beacons & Driver Feedback

RRFB Pedestrian Crosswalk System:

The Rectangular Rapid Flashing Beacon Crosswalk System delivers a highly-effective flash pattern that offers real-time warnings to drivers to increase awareness and safety.

- ADA Compliant
- LED Enhanced Warnings
- Wide variety of activation options
- Selectable power levels
- Single-sided or double-sided
- Self-contained control cabinets
- See manufacturers' specifications for details

AC & Solar options available!

LED Enhanced Signs & Flashing Beacons:

Flashing LED signs have been proven to increase driver awareness and roadway compliance, creating a safer environment for all road users. LED options are available for almost all traffic signs.

A&A Safety also offers school zone beacons and installs RRFB systems. A&A Safety teams can also handle pavement marking and even custom crosswalks to improve safety at schools and colleges.

Driver Feedback Signs:

Driver feedback signs serve as a protective measure to help slow down speeding vehicles, especially in school zones, residential neighborhoods and high-risk areas where safety is a concern.

Driver feedback signs quickly display a driver's speed, serving as a visual reminder of their current speed compared to the posted limit. This helps drivers become more aware of their actions and encourage them to reduce speed.

School Zone Beacon System:

School zone flashing dual beacons, crucial safety fixtures, effectively alert drivers to reduced speed limits during school hours. Their twin lights enhance visibility, ensuring heightened awareness and compliance with traffic regulations, particularly in areas frequented by children.

Ask Us About Installation!

Rollup Signs, Traffic Control & Hydraulic Tools

Rollup Signs

Sign Stands

Water Wall & Fencing

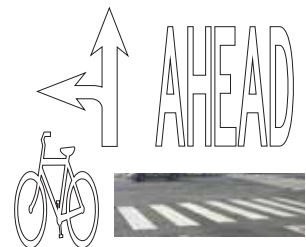

Traffic Cones & Cone Bars

Barricades

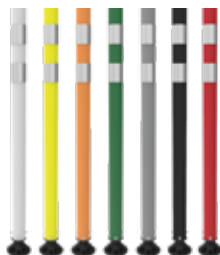

Preformed Thermoplastic

Channelizing Curbs

Signage, Posts, Poles & Aluminum Products

Regulatory Signs:

Posts, Brackets, Mounting Options:

Construction Signage:

Construction signage and sign fabrication have been part of our core business from the very beginning. As an authorized sign shop for several state DOT organizations, we produce signs that meet MUTCD standards. We also know what it takes to design, manufacture and install signage for public roads, parks, schools and commercial locations.

Standard & Custom Aluminum, Decorative Poles, Sign Shop Supplies:

Specialty Printing:

Ask us about custom sign manufacturing for street signs, wayfinding, and more. Temporary and permanent signs are produced in-house at A&A Graphics.
